Whether you're already an accomplished painter, but are new to acrylic paints, or you are a complete beginner, this book will walk you through all you need to know about acrylic painting and will give you the confidence to start painting to your heart's content.

Compared to other types of painting, painting with acrylics is a relatively new thing. Acrylic compounds weren't really invented until the beginning of the twentieth century, and even then, they were primarily used in industry. In the 1930s, artists began to experiment with acrylic painting, but it didn't really take off until the 1950s, when the first water-based acrylic paints were introduced onto the market.

There are certain techniques that you will need to learn in order to be able to paint successfully with acrylic paints – this is particularly important if you are already used to painting with other mediums. Once you have mastered the techniques, however, you will be able to produce quality works of art that you will be happy to show off to friends and family.

The book will also cover other issues to do with painting with acrylics, such as how to choose a subject, mix your colors, and create shade and tints on your painting. Much of it you will only really get to grips with as you put the tips into practice, but it is still useful to have a strong idea of what to expect.

Before you know it, provided you put the practice in, you will be producing paintings that you are proud to hang on the walls of your home.

I made this crash course to show you HOW you can learn Acrylic Painting FASTER than you ever thought possible. I will teach YOU step by step the Acrylic Painting extremely quickly. I will TAKE you through a step by step guide where you simply can't get lost!

This course-book will allow you to practice, learn and deepen your knowledge of Acrylic Painting in an entertaining, interactive, autonomous and flexible course.
