Are you a young composer who has spent much of his time composing songs and he would like to share them to the world? You do not have much to spend and would like to find some free solution to do this? Well, this is possible, and I'll explain how to do it easily, quickly and intuitively. Just knowing the right services and have a lot of creativity!

This ebook is the result of my personal experience in finding the means for online publication of musical compositions. Your goal will be to be able to spread your songs on the major digital stores worldwide, among which the most famous is definitely iTunes, Play Music, Spotify and many more.

Given the fact that what I will explain it will not be a method to add a song to each store individually, but I will explain how to spread it through a single aggregator, that will do all the work for you.

On the internet, searching through various sites I came across on the portals that offer services really excellent, but that cost quite a bit, I'll get even further by showing what should choose and which do not.

Remember that at the time, the portals that I used are entirely in English, however, easy to understand, and somehow this guide will explain how to use them to the fullest.
