**Charts Don't Lie: 4 Untold Trading Indicators: How to Make Money with Technical Analysis (in Stocks, Bonds, Options, Futures, and Commodities) (Technical Analysis Mastery Book 1)** Steve Ryan

**Have you gotten confused already with *MACD, StochRSI, ADX, Stochastics, Fibonacci Retracement, RSI, Parabolic SAR, Williams %R, Aroon, Ease of Movement (EMV), and more....***

What if these popular indicators mentioned in most investment books are not the only ones out there?

**And have you ever wondered how to invest correctly and how to make money in the market when those trading indicators contradict one another?**

Comprehensive but simple at the same time, this book decodes technical analysis in a straightforward, effective manner.

## **Why you need to learn technical analysis**

Because although fundamental analysis is important to gauge a stock's long term potential, without knowledge on technical analysis, most likely you will buy --- or sell --- at the wrong price and at the wrong time.

My friend bought Apple when it was \$700. Yes, it is now above \$800 (with price before the 7:1 split), however, he had to wait almost a year when Apple price went down to as low as \$380, before bounced back.

He was right all the time. Apple is a great company. But he had to suffer before he could confirm his conviction.

Why not buy when the uptrend is about to happen? Why not sell when the downtrend is imminent?

Technical analysis is how you optimize your entry and exit, and relieve you from the trading stress.

## **How technical analysis improves your trading**

I guarantee you these 4 technical analysis tools are not the ones you will hear from your investment advisers, fund manager, retirement planner, or your finance professor in college when they lecture you on how to invest in stocks or any other securities.

It is my humble expectation this book can give you some additional insights and add an extra ammo to your vast investing and trading arsenal.

**Whether you are investing for beginners, or investing for retirement, I am confident you will get some values from this book and hopefully, add your knowledge on how to make money in the market.**

## **What you'll learn in this book**

- 1) Why Warren Buffet once said "*In Investing, Rule # 1: Don't Lose. Rule # 2: See Rule Number 1.*"
- 2) **The caveat of using trading indicators, ANY trading indicator, to your stock trading and stock investing. Forewarned is forearmed!**
- 3) How to set the four indicators up and make profits in the stock market, or any market not excluding options, futures, and Forex.
- 4) **How to set the four indicators up and apply them in live market, whether you are day trading, swing trading, or long term investing.**

**Are you really doing what it takes to be a consistently profitable investor or trader, or just talking about it?**

If you haven't already, get the FREE course **Zero to Trading:How to Double Your Trading Skills in 3 Days** from [MoneyVersity.net/Zero-to-Trading](http://MoneyVersity.net/Zero-to-Trading)

The course consists of secret basic sauces of what make traders consistently profitable.

## **Don't Leave Your Trading to Chances...**

...because then frankly, you just gamble your money away. Might as well go to Vegas. More fun.

Trading is a respectable profession that requires commitment, determination, and persistence. The trading learning curve also requires your time, energy, and capital.

Technical analysis is just one tool but many times, the importance of technical analysis has gotten lost in the noise of financial news and incomplete fundamental analysis.

***Charts Don't Lie* strives to educate traders and investors who are never too tired to learn and improve their skills on how to use technical analysis the simple and straight-shooting way.**
