## **Finishes (Mitchell's Building)** Alan Everett

One in a series aimed at students preparing for the examinations of the RIBA, RiCS, IQS, IOB, the Ordinary and Higher National Certificates and the City and Guilds of London Institute courses in building, this volume considers the performance requirements for Finishes for buildings and the effectiveness of typical solutions. All quantities are expressed in SI units and there are tables giving imperial conversions. Also included are the main CI/SfB classifications with cross references to the relevant volumes and chapters in the series. This series of text books has been rewritten to bring it in line with rapid technical developments in building and consequent revision of syllabuses. It should be a useful reference source for practising architects, surveyors and engineers.
