George B. Dantzig, Mukund N. Thapa

Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) George B. Dantzig, Mukund N. Thapa

Encompassing all the major topics students will encounter in courses on the subject, the authors teach both the underlying mathematical foundations and how these ideas are implemented in practice. They illustrate all the concepts with both worked examples and plenty of exercises, and, in addition, provide software so that students can try out numerical methods and so hone their skills in interpreting the results. As a result, this will make an ideal textbook for all those coming to the subject for the first time.

Authors' note: A problem recently found with the software is due to a bug in Formula One, the third party commercial software package that was used for the development of the interface. It occurs when the date, currency, etc. format is set to a non-United States version. Please try setting your computer date/currency option to the United States option . The new version of Formula One, when ready, will be posted on WWW.

From reader reviews:

Michael Floyd:

Spent a free time for you to be fun activity to try and do! A lot of people spent their down time with their family, or all their friends. Usually they doing activity like watching television, about to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Can be reading a book can be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) can be good book to read. May be it could be best activity to you.

Tony Hill:

Reading can called brain hangout, why? Because if you are reading a book specifically book entitled Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) your thoughts will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely can be your mind friends. Imaging just about every word written in a e-book then become one application form conclusion and explanation that maybe you never get before. The Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) giving you yet another experience more than blown away the mind but also giving you useful facts for your better life on this era. So now let us present to you the relaxing pattern this is your body and mind will likely be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Ollie Nadeau:

Are you kind of active person, only have 10 or even 15 minute in your time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are having problem with the book than can satisfy your short space of time to read it because pretty much everything time you only find e-book that need more time to be go through. Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) can be your answer given it can be read by you actually who have those short free time problems.

Julia Barr:

Don't be worry in case you are afraid that this book will filled the space in your house, you might have it in e-book means, more simple and reachable. This particular Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1) can give you a lot of friends because by you taking a look at this one book you have matter that they don't and make you more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't recognize, by knowing more than different make you to be great people. So ,

why hesitate? We need to have Linear Programming 1: Introduction (Springer Series in Operations Research and Financial Engineering) (v. 1).
