Multi-Camera Networks: Principles and Applications

Multi-Camera Networks: Principles and Applications

- The first book, by the leading experts, on this rapidly developing field with applications to security, smart homes, multimedia, and environmental monitoring
- Comprehensive coverage of fundamentals, algorithms, design methodologies, system implementation issues, architectures, and applications
- Presents in detail the latest developments in multi-camera calibration, active and heterogeneous camera networks, multi-camera object and event detection, tracking, coding, smart camera architecture and middleware

This book is the definitive reference in multi-camera networks. It gives clear guidance on the conceptual and implementation issues involved in the design and operation of multi-camera networks, as well as presenting the state-of-the-art in hardware, algorithms and system development. The book is broad in scope, covering smart camera architectures, embedded processing, sensor fusion and middleware, calibration and topology, network-based detection and tracking, and applications in distributed and collaborative methods in camera networks. - This book will be an ideal reference for university researchers, R&D engineers, computer engineers, and graduate students working in signal and video processing, computer vision, and sensor networks.

Hamid Aghajan is a Professor of Electrical Engineering (consulting) at Stanford University. His research is on multi-camera networks for smart environments with application to smart homes, assisted living and well being, meeting rooms, and avatar-based communication and social interactions. He is Editor-in-Chief of Journal of Ambient Intelligence and Smart Environments, and was general chair of ACM/IEEE ICDSC 2008.

Andrea Cavallaro is Reader (Associate Professor) at Queen Mary, University of London (QMUL). His research is on target tracking and audiovisual content analysis for advanced surveillance and multi-sensor systems. He serves as Associate Editor of the IEEE Signal Processing Magazine and the IEEE Trans. on Multimedia, and has been general chair of IEEE AVSS 2007, ACM/IEEE ICDSC 2009 and BMVC 2009.

Presents in detail the latest developments in multi-camera calibration, active and heterogeneous camera networks, multi-camera object and event detection, tracking, coding, smart camera architecture and middleware

Jennifer Bryan:Do you have something that you like such as book? The e-book lovers usually prefer to opt for book like comic, quick story and the biggest some may be novel. Now, why not striving Multi-Camera Networks: Principles and Applications that give your entertainment preference will be satisfied by reading this book. Reading addiction all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be explained constantly that reading addiction only for the geeky person but for all of you who wants to be success person. So , for all you who want to start reading through as your good habit, you are able to pick Multi-Camera Networks: Principles and Applications become your current starter.

Martin Duval:In this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become among it? It is just simple way to have that. What you have to do is just spending your time very little but quite enough to get a look at some books. Among the books in the top collection in your reading list is Multi-Camera Networks: Principles and Applications. This book that is qualified as The Hungry Hillsides can get you closer in getting precious person. By looking up and review this guide you can get many advantages.

Jolene Rivera:What is your hobby? Have you heard this question when you got scholars? We believe that that question was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you know that little person similar to reading or as examining become their hobby. You have to know that reading is very important along with book as to be the thing. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You find good news or update concerning something by book. Different categories of books that can you choose to use be your object. One of them is Multi-Camera Networks: Principles and Applications.
