Virgil in the Renaissance

David Scott Wilson-Okamura

Virgil in the Renaissance David Scott Wilson-Okamura

The disciplines of classical scholarship were established in their modern form between 1300 and 1600, and Virgil was a test case for many of them. What became of Virgil in this period - how he was understood and how his poems were recycled - is an example of something that occurs to every classic when it outlives its original context: the words remain but their meaning becomes unsponsored. What did readers assume about Virgil in the long decades between Dante and Sidney, Petrarch and Spenser, Boccaccio and Ariosto? Which commentators had the most influence? What story, if any, was Virgil's Eclogues supposed to tell? What was the status of his Georgics? Which parts of his epic attracted the most imitators? Building on specialized scholarship of the last hundred years, this book provides a panoramic synthesis of what scholars and poets from across Europe believed they could know about Virgil's life and poetry.
