Family-Centered Care: Putting It into Action : The Spn/Ana Guide to Family-Centered Care (American Nurses Association) American Nurses Association, Linda A. Lewandowski

Co-developed by the Society of Pediatric Nurses and the American Nurses Association, this practice-focused handbook is built around family-centered care. This FCC model and standard of pediatric healthcare practice focuses on the child within the context of the child's family as a unit, not on the ill or injured child alone. As such, it applies to the care of children and their families across settings and across specialties of neonatal, child, and adolescent healthcare. Evidence-based in its comprehensive literature search and grounded in an expansive concept of family, this guide is a primary reference for any administrator, clinician, educator, or researcher involved in pediatric health care. It is organized by the eight elements of family-centered care as originally described by the Association for the Care of Children's Health (see below) and accompanying practice recommendations. This guide was developed with the assistance of panel of pediatric experts convened by the Society of Pediatric Nurses and input from the Institute for Family-Centered Care. It complements Scope and Standards of Pediatric Nursing Practice, also co-published by SPN and ANA. .
