Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies)

Jun Feng, Toyohide Watanabe

Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies) Jun Feng, Toyohide Watanabe

This book presents the index and query techniques on road network and moving objects which are limited to road network. Here, the road network of non-Euclidean space has its unique characteristics such that two moving objects may be very close in a straight line distance. The index used in two-dimensional Euclidean space is not always appropriate for moving objects on road network. Therefore, the index structure needs to be improved in order to obtain suitable indexing methods, explore the shortest path and acquire nearest neighbor query and aggregation query methods under the new index structures.

Chapter 1 of this book introduces the present situation of intelligent traffic and index in road network, Chapter 2 introduces the relevant existing spatial indexing methods. Chapter 3-5 focus on several issues of road network and query, they involves: traffic road network models (see Chapter 3), index structures (see Chapter 4) and aggregate query methods (see Chapter 5). Finally, in Chapter 6, the book briefly describes the applications and the development of intelligent transportation in the future.

From reader reviews:

Brian Lopez:

What do you consider book? It is just for students because they are still students or that for all people in the world, exactly what the best subject for that? Simply you can be answered for that query above. Every person has various personality and hobby per other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies). All type of book could you see on many resources. You can look for the internet options or other social media.

Edward Rideout:

Many people spending their time by playing outside along with friends, fun activity using family or just watching TV all day long. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book can really hard because you have to accept the book everywhere? It ok you can have the e-book, taking everywhere you want in your Smart phone. Like Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies) which is obtaining the e-book version. So , why not try out this book? Let's observe.

Marlene Clabaugh:

Don't be worry for anyone who is afraid that this book may filled the space in your house, you could have it in e-book technique, more simple and reachable. This particular Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies) can give you a lot of pals because by you looking at this one book you have thing that they don't and make anyone more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't know, by knowing more than some other make you to be great people. So , why hesitate? Let us have Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies).

Santiago Johnson:

Publication is one of source of knowledge. We can add our expertise from it. Not only for students but additionally native or citizen will need book to know the revise information of year for you to year. As we know those publications have many advantages. Beside most of us add our knowledge, also can bring us to around the world. From the book Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies) we can take more advantage. Don't you to be creative people? To be creative person must love to read a book. Simply choose the best book that suitable with your aim. Don't become doubt to change your life with that book Index and Query Methods in Road Networks (Smart Innovation, Systems and Technologies). You can more desirable than now.
