Introduction to Programming Using Java: An Object-Oriented Approach David M. Arnow, Gerald Weiss

Using the Java language, this book introduces the beginning computer science student to the concepts of class, object, and message in the first chapter. This object-oriented approach is used throughout the text, as students learn the fundamentals of object-oriented programming along with the basics of imperative programming. Because Java is an object-oriented language that reflects the acquired wisdom of thirty years of programming language design, the book can effectively focus on programming and the process of class design. Early on, a clear, usable procedure for solving problems by developing classes is presented and then used throughout the text.Java's support for GUI and network programming makes a great setting for diverse programming examples: a calculator, a strategy game, reading the Dow Jones from Yahoo!, a Web surveyor application, scheduling songs for a rock-and-roll radio station, as well as traditional payroll and student GPA computations. Working with these and other examples, students learn to think like a programmer, analyze problems, devise solutions, design classes, and write code.Features * Uses the necessary features of Java 1.1 while teaching CS1 concepts. * Uses object-oriented concepts from the very beginning--classes, objects, and messages are all introduced in Chapter 1--and develops them throughout. * Applies a consistent class design procedure, usable by beginners. * Contains graphic user interface (GUI) supplements in each chapter. * Provides an early introduction to testing, covering test drivers, debugging, and test case selection. * Includes a chapter with three robust applications--a LOGO turtle, a Web surveyor, and Mancala (a strategy game)-- which use the text's class design procedure and allow the students to tie the material together. 0201311844B04062001

From reader reviews:

Jordan Weatherspoon:

People live in this new day time of lifestyle always try and and must have the time or they will get wide range of stress from both daily life and work. So , if we ask do people have time, we will say absolutely sure. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then do you try this one, reading ebooks. It can be your alternative inside spending your spare time, the book you have read is definitely Introduction to Programming Using Java: An Object-Oriented Approach.

Mindy Arredondo:

As a student exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that studying is not important, boring as well as can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Introduction to Programming Using Java: An Object-Oriented Approach can make you really feel more interested to read.

Susan Spiegel:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. So you know that little person including reading or as looking at become their hobby. You should know that reading is very important and book as to be the issue. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update concerning something by book. Many kinds of books that can you take to be your object. One of them is niagra Introduction to Programming Using Java: An Object-Oriented Approach.

Larry Moore:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is written or printed or created from each source which filled update of news. On this modern era like now, many ways to get information are available for you. From media social including newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Introduction to Programming Using Java: An Object-Oriented Approach when you needed it?
