New Trends on System Science and Engineering (Frontiers in Artificial Intelligence and Applications)

H. Fujita, S.-F. Su

System science and engineering is a field that covers a wide spectrum of modern technology. A system can be seen as a collection of entities and their interrelationships, which forms a whole greater than the sum of the entities and interacts with people, organizations, cultures and activities and the interrelationships among them. Systems composed of autonomous subsystems are not new, but the increased complexity of modern technology demands ever more reliable, intelligent, robust and adaptable systems to meet evolving needs. This book presents papers delivered at the International Conference on System Science and Engineering (ICSSE2015), held in Morioka, Japan, in July 2015. Some of the topics covered here include: systems modeling, tools and simulation; cloud robotics and computing systems; systems safety and security; smart grid, human systems and industrial organization and management; and novel applications of systems engineering and systems architecture. Capturing as it does the latest state-of-the-art and challenges in system sciences and its supporting technology, this book will be of interest to all those involved in developing and using system science methodology, tools and techniques.

From reader reviews:

Melanie Ratcliff:

The guide with title New Trends on System Science and Engineering (Frontiers in Artificial Intelligence and Applications) contains a lot of information that you can understand it. You can get a lot of benefit after read this book. This book exist new expertise the information that exist in this guide represented the condition of the world at this point. That is important to you to find out how the improvement of the world. That book will bring you inside new era of the global growth. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Teresa Jones:

Your reading sixth sense will not betray a person, why because this New Trends on System Science and Engineering (Frontiers in Artificial Intelligence and Applications) reserve written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your own personal hunger then you still skepticism New Trends on System Science and Engineering (Frontiers in Artificial Intelligence and Applications) as good book not merely by the cover but also by content. This is one book that can break don't determine book by its cover, so do you still needing another sixth sense to pick this kind of!? Oh come on your studying sixth sense already alerted you so why you have to listening to yet another sixth sense.

Arthur Reaves:

Reading a book for being new life style in this yr; every people loves to read a book. When you go through a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. In order to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, along with soon. The New Trends on System Science and Engineering (Frontiers in Artificial Intelligence and Applications) offer you a new experience in reading through a book.

Melanie Fox:

As a pupil exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this New Trends on System Science and Engineering (Frontiers in Artificial

Intelligence and Applications) can make you experience more interested to read.
