Physics for Radiation Protection James E. Martin

A practical guide to the basic physics that radiation protection professionals need

A much-needed working resource for health physicists and other radiation protection professionals, this volume presents clear, thorough, up-to-date explanations of the basic physics necessary to address real-world problems in radiation protection. Designed for readers with limited as well as basic science backgrounds, Physics for Radiation Protection emphasizes applied concepts and carefully illustrates all topics through examples as well as practice problems.

Physics for Radiation Protection draws substantially on current resource data available for health physics use, providing decay schemes and emission energies for approximately 100 of the most common radionuclides encountered by practitioners. Excerpts of the Chart of the Nuclides, activation cross sections, fission yields, fission-product chains, photon attenuation coefficients, and nuclear masses are also provided. Coverage includes:

- * The atom as an energy system
- * An overview of the major discoveries in radiation physics
- * Extensive discussion of radioactivity, including sources and materials
- * Nuclear interactions and processes of radiation dose
- * Calculational methods for radiation exposure, dose, and shielding
- * Nuclear fission and production of activation and fission products
- * Specialty topics ranging from nuclear criticality and applied statistics to X rays
- * Extensive and current resource data cross-referenced to standard compendiums
- * Extensive appendices and more than 400 figures

From reader reviews:

Lester Jaworski:

Book is written, printed, or created for everything. You can realize everything you want by a guide. Book has a different type. As it is known to us that book is important matter to bring us around the world. Next to that you can your reading skill was fluently. A book Physics for Radiation Protection will make you to be smarter. You can feel more confidence if you can know about every little thing. But some of you think that open or reading the book make you bored. It isn't make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Joseph Barnett:

This Physics for Radiation Protection book is just not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this e-book incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This particular Physics for Radiation Protection without we understand teach the one who reading it become critical in contemplating and analyzing. Don't become worry Physics for Radiation Protection can bring whenever you are and not make your tote space or bookshelves' become full because you can have it with your lovely laptop even telephone. This Physics for Radiation Protection having good arrangement in word and also layout, so you will not sense uninterested in reading.

Loren Benton:

Your reading sixth sense will not betray you actually, why because this Physics for Radiation Protection publication written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written within good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still question Physics for Radiation Protection as good book not only by the cover but also by content. This is one guide that can break don't judge book by its include, so do you still needing a different sixth sense to pick this!/? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.

Alice Navarro:

A lot of people said that they feel bored stiff when they reading a book. They are directly felt the item when they get a half parts of the book. You can choose the book Physics for Radiation Protection to make your current reading is interesting. Your personal skill of reading talent is developing when you similar to reading. Try to choose easy book to make you enjoy you just read it and mingle the idea about book and looking at especially. It is to be initial opinion for you to like to wide open a book and learn it. Beside that the e-book Physics for Radiation Protection can to be your new friend when you're experience alone and confuse using what must you're doing of these time.
