Distributed Data Fusion for Network-Centric Operations

Distributed Data Fusion for Network-Centric Operations

With the recent proliferation of service-oriented architectures (SOA), cloud computing technologies, and distributed-interconnected systems, distributed fusion is taking on a larger role in a variety of applications?from environmental monitoring and crisis management to intelligent buildings and defense. Drawing on the work of leading experts around the world, **Distributed Data Fusion for Network-Centric Operations** examines the state of the art of data fusion in a distributed sensing, communications, and computing environment.

Get Insight into Designing and Implementing Data Fusion in a Distributed Network

Addressing the entirety of information fusion, the contributors cover everything from signal and image processing, through estimation, to situation awareness. In particular, the work offers a timely look at the issues and solutions involving fusion within a distributed network enterprise. These include critical design problems, such as how to maintain a pedigree of agents or nodes that receive information, provide their contribution to the dataset, and pass to other network components. The book also tackles dynamic data sharing within a network-centric enterprise, distributed fusion effects on state estimation, graph-theoretic methods to optimize fusion performance, human engineering factors, and computer ontologies for higher levels of situation assessment.

A comprehensive introduction to this emerging field and its challenges, the book explores how data fusion can be used within grid, distributed, and cloud computing architectures. Bringing together both theoretical and applied research perspectives, this is a valuable reference for fusion researchers and practitioners. It offers guidance and insight for those working on the complex issues of designing and implementing distributed, decentralized information fusion.

From reader reviews:

Melanie Moore:

In this 21st centuries, people become competitive in each and every way. By being competitive today, people have do something to make these survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yes, by reading a reserve your ability to survive enhance then having chance to endure than other is high. For you personally who want to start reading any book, we give you that Distributed Data Fusion for Network-Centric Operations book as nice and daily reading book. Why, because this book is more than just a book.

Patricia Northcutt:

Hey guys, do you wishes to finds a new book to read? May be the book with the headline Distributed Data Fusion for Network-Centric Operations suitable to you? The actual book was written by well-known writer in this era. The particular book untitled Distributed Data Fusion for Network-Centric Operationsis the main one of several books which everyone read now. This book was inspired a number of people in the world. When you read this guide you will enter the new age that you ever know before. The author explained their concept in the simple way, thus all of people can easily to be aware of the core of this reserve. This book will give you a lots of information about this world now. To help you see the represented of the world in this book.

Dennis Rodriguez:

The book Distributed Data Fusion for Network-Centric Operations has a lot details on it. So when you read this book you can get a lot of profit. The book was compiled by the very famous author. The writer makes some research just before write this book. This particular book very easy to read you will get the point easily after looking over this book.

Robert Alston:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from your book. Book is created or printed or descriptive from each source this filled update of news. On this modern era like currently, many ways to get information are available for you actually. From media social including newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search of the Distributed Data Fusion for Network-Centric Operations when you required it?
