Cisco ASA for Accidental Administrators: An Illustrated Step-by-Step ASA Learning and Configuration Guide Don R. Crawley

Cisco ASA for Accidental Administrators, version 1.1, is a major update to the previous Accidental Administrator ASA book. This new edition is packed with 48 easy-to-follow hands-on exercises to help you build a working firewall configuration from scratch. Based on software version 9.x, it continues as the most straight-forward approach to learning how to configure the Cisco ASA Security Appliance, filled with practical tips and secrets learned from years of teaching and consulting on the ASA. There is no time wasted on boring theory. The essentials are covered in chapters on installing, backups and restores, remote administration, VPNs, DMZs, usernames, transparent mode, static NAT, port address translation, access lists, DHCP, password recovery, logon banners, AAA (authentication, authorization and accounting), filtering content and more. Inside this concise, step-by-step guide, you'll find:

• How to backup and restore software images and configurations
• How to configure different types of VPNs, including AAA authentication
• The secrets to successfully building and implementing access-lists

All this information is presented in a straight-forward style that you can understand and use right away. The idea is for you to be able to sit down with your ASA and build a working configuration in a matter of minutes. Of course, some of the more advanced configs may take a little longer, but even so, you'll be able to "get it done" in a minimal amount of time!
