Immigration Phobia and the Security Dilemma: Russia, Europe, and the United States Mikhail A. Alexseev

Through a comparative study of immigration attitudes in the Russian Far East, the EU, and the United States, this book demonstrates that concerns about national identity and economic interests associated with migration are ignited by a unique perception of the security dilemma. Regression analysis and case studies trace support for expulsion of migrants to the need for self-defense within an environment of uncertainty. Highlighting migration as an national security problem is therefore logical, but counterproductive, and this book recommends instead the management of migration through economic incentives at the global, national, and local level.
